

METCA Mavericks

By DUANE H. FEISEL

P.O. Box 11661, Palo Alto, CA. 94306

1973 - ISSUE 1

= MAVERICK "GROUND RULES" =

The attribution of maverick tokens is a challenging task, but the satisfaction is great when one can be nailed down to a specific user and location. In order that this part of the benefits from belonging to METCA can be of most use, I want to establish the rules listed below. I think they are reasonable, but they are subject to modification and change.

1. Maverick listings and attributions should be sent to: Duane H. Feisel, P.O. Box 11661, Palo Alto, CA 94306.
2. Submissions should be merchant tokens only.
3. Your submissions should be restricted to tokens which have a reasonable possibility of being attributed. Usually this means an unusual business or proprietor name, a token with both the business and proprietor name, or a token with a street address.
4. Each submission should be accompanied by a rubbing of the piece. For the most part, the items to be listed here will consist of rubbings as you can see on the following pages. A rubbing will often give clues as to the age of a token and/or the manufacturer, both important characteristics in attempting an attribution.
5. In addition to the rubbing, the inscription on the token should be listed. Be sure to look for tiny letters which are the manufacturer's "signature."
6. If you will send along a stamped addressed envelope with your submissions, I will advise you of any attributions I can make immediately.
7. When attributions of mavericks are made, please furnish the basis for the attribution, such as "directory listing", "catalogued by ...", "from another token with location", etc.

= MAKING TOKEN RUBBINGS =

The preparation of good token rubbings is not very difficult. I find the following technique to be easy, fast, and with good results. First off, select a relatively soft paper on which to make the rubbings--I use cheap typing paper. I cut up the paper to a convenient size such as about 2 3/4" X 4 1/2", and put one rubbing on each small sheet. To make the rubbing, the token is placed on a firm surface, the paper positioned on top of the token, and the whole thing held in place with the smallest size 2x2 cardboard coin holder which will fit over the token. The cellophane or plastic must be removed from the holder. The cardboard helps to keep everything in place as you rub the entire surface of the piece. I use a large diameter lead blue colored pencil with a blunt point; other color soft lead pencils can also be used. The pencil is held vertically in making the rubbing with special attention paid to making sure that all the letters and designs are rubbed completely.

Errors in Maverick Numbering

In the METCA MAVERICKS 1972 - Issues 6, 7 and 8, there have been errors in numbering the various tokens. To avoid any further confusion with these errors, please make the following corrections in the numbering:

Issue 6 - p. 24: add suffix A to the numbers; thus
731A, 732 A, 733A, 734A

Issue 7 - p. 25-26: add suffix A to the tokens with
numbers from 735 through 752

Issue 8 - p. 30; add suffix A to the tokens numbered
780 through 789 which are listed after #789,
and renumber the last token #790

1973 - ISSUE 2

= MAVERICK TOKEN COMMENTS =

Only a few things to cover this month. First off, please send all correspondence regarding this section to me--Ray has enough to do without having to forward things to me.

Next, I want to add another item to the "groundrules", and that is that you send only rubbings (not impressions since they do not reproduce well) of your tokens. Please place the rubbings for one token on one small sheet of paper, and include on the sheet the metal, size, the inscription and your METCA membership number.

When I get your rubbings, they are sorted into three categories: (1) attributable, (2) probably attributable, (3) probably not attributable. Category (1) includes tokens which carry a street address, which have both a business name and proprietor name, or an unusual business or proprietor name; (2) includes tokens with distinctive business or proprietor names; (3) includes tokens which have initials only, common business names or common proprietor names. Since there are many thousands of maverick tokens to be identified, it seems reasonable to concentrate on those which have a reasonable chance of being attributed. Thus, what I hope to present to you will be mainly tokens from my category (1), perhaps some from category (2), and almost never any from category (3) unless I run short of material (which does not seem likely).

One final note. Some time in the future I will be running lists of tokens without rubbings where the reverse designs are of a standard type such as Ingle System, Brunswick-Balke-Collender, etc. But I still need the rubbings so that I can determine the standard reverse type.

1973 - ISSUE 3

= MAVERICK TOKEN COMMENTS =

Keeping track of the maverick tokens reported and then attributed is a real job! I am gradually setting up a file card system, but that can go only so far. From what I know about computer generated listings, that would seem to be the way to go. No matter how such a listing might be done, it will be a major undertaking. I wonder how many collectors would be interested in a catalogue of maverick tokens?

One of the most useful compilations of maverick tokens I have seen has been done by Sam Ruggeri, METCA #211. Sam has taken all the TAMS listed maverick trade tokens through May 1972 and put them into two listings. The first list is an alphabetical arrangement of the names on the maverick tokens, and the second is an alphabetical arrangement by name of all the attributed tokens. Both lists are available for a total cost of \$1.50 from Mr. Ruggeri at P.O. Box 561, No. Bellmore, NY 11710.

= ATTRIBUTIONS =

#729 BURNS POOL HALL, COPPERFIELD, ORE.

An error was made previously in attributing maverick #727 to Copperfield. The correction was sent in by Ed Saunders.

#795 PELICAN BREWING COMPANY, NEW ORLEANS, LA.

Ken Bassett finds that the Pelican Brewing Co. was one of four companies comprising the Louisiana Brewing Association in 1898.

#819 POOL ROOM P. HERTZ, PROP., DENVER, COLO.

The address on the token should be 1738 rather than 738 as shown in the rubbing and listing according to Jim Zervas who found a listing in his 1919 Denver city directory; the P. stands for Phillip. By 1928 there was another owner. Lee Nott also attributed this token to Denver.

#821 THE PIKE RECREATION, DENVER, COLO.

As pointed out by Blaine Simons, this piece was previously attributed in the TAMS listing. There is a set of tokens from the place according to Forrest Dunham who also gives Seattle as the correct attribution.

#825 UPTONS CORNER, WALLA WALLA, WASH.

Location by Forrest Dunham.

#826 A.J. CUENY, ST. LOUIS, MO.

Sorry to say that I neglected to record who reported the location for this piece. Whoever it was also has another token for the same user: A.J. CUENY (1) / GOOD FOR / 5¢ / WITH M.T. BOTTLE (1) // (star), brass 23 mm. The (1) in this inscription means that that line of the inscription is in incuse letters--remember this notation since it will be used again for future listings.

#831 THE AM. EXCHANGE SALOON, M.P. KALICH, SUTTER CREEK, CAL.

Chriss Christiansen maintains a card index of the names of saloons and saloon proprietors for California, and found a listing in his index. A directory for 1898-99 carries a listing for an American Exchange Hotel in Sutter Creek.

METCA Mavericks By DUANE H. FEISEL

1973 - ISSUE 4

• MAVERICK TOKEN INCIDENTS •

Sorry for missing a couple of issues--too many demands on my time recently. However, perhaps Ray will be able to run a couple of double issues to bring us back to par. Although I have a huge supply of maverick token rubbings on hand, most are from one source and will be worked into these listings gradually. So, if you have an interesting maverick token, send in a rubbing and it may not take too long to be published.

- ATTRIBUTIONS -

- 0796 ANTONIO TAGAROPULOS, PANAMA
James Zervas reports that his father is a friend of the Tagaropulos family which resides in Panama. Many years ago one brother of three operated a dairy. The family now is involved with a Pepsi Cola bottling franchise. I have written to one of the brothers in Panama for information about the token, but no reply has been received.
- 0807 LEBANON BILLIARDS, LEBANON, ORE.
A 10¢ with city and state inscribed for this user, owned by Anthony R. Talbo METCA #401, provides the basis for the attribution of this piece.
- 0812 ANGELUS POOL ROOM, LOS ANGELES, CAL.
This business was located only a block away from the famed Angels Flight Railway according to Agnar Wahlberg.
- 0821 THE PIKE RECREATION, SEATTLE, WASH.
In the 1973 - Issue 3 of "Metca Mavericks," this token was attributed to Denver, Colo., through a typographical error.
- 0824 E.G. SPECHT, PORTLAND, ORE.
Terry Trantow has another token for the same party, but with a different street address. A listing for this Burnside Street address was located in a 1905 plat book; at that time N. 7th Street did not exist, so it is supposed that this is a later token for the same user which was listed as a saloon.
- 0835 NEVADA SAMPLE ROOM, TACOMA, WASH. ???
Clancy Riggs suggests that the address is a Tacoma street address. Perhaps someone can find a directory listing or other confirmation for the business.
- 0841 KENTUCKY DERBY, OMAHA, NEB. ???
Riggs again suggests that this token carries an Omaha street address. Hopefully, someone will be able to confirm this.
- 0844 H. RUNCK, DAYTON, KY.
Stanley L. Buckley METCA #220 has a token for this user which is inscribed with city and state. Many of the Kentucky tokens occur in very interesting shapes, and this one in the shape of a horse's head and neck is no exception.
- 0849 K.B. & C., CAMBRIA, WYO.
When I got this token in the Black Hills of S.D., I was told that it was from Wyoming, and Orland M. Berglund, METCA #134, confirms this attribution. He has a similar 10¢ token in brass.
- 0855 ATLA CASH STORE, ATLA, CAL. (TULARE COUNTY)
Clancy Riggs found a listing for a place called Atla in a railroad shipping guide from the 1930's. I have checked County maps and find several features containing the name "Atla," but no specific place is indicated for the location. Similarly, I have not been able to find any directory listings for the proprietor's name. The fact that the token was made by a San Francisco manufacturer, however, strongly suggests that the attribution is correct.

METCA Mavericks

By DUANE H. FEISEL

P.O. BOX 17841 PHOENIX, AZ 85016

1973 - ISSUE 5

= MAVERICK TOKEN COMMENTS =

Reading up the listing this month is a diversion "good for" mirror. Trade mavericks are scarce items which are normally collected, especially here in the west. I have a small collection of these, and am engaged in paraphrasing all "good for" mirrors from my state with the sincere aim of producing a catalogue of these interesting items. Any help or listicles will be appreciated. Incidentally, of all the "good for" mirrors I have seen so far, this is the first maverick! Most of the "good for" or trade mirrors have a street address in addition to the city and state.

= ATTRIBUTIONS =

#832 LOG CABIN BAKERY, EUREKA, CAL.

Errol L. Kupper points out that this mirror was listed in Albin's Catalogue of California Trade Tokens as Num 25 80. This attribution is somewhat embarrassing to me since I own the token, have a large collection of California trade tokens, and own the Albin catalogue all the time!

#836 L.R.O. (LINDSAY RIPE OLIVE), LINDSAY, CAL.

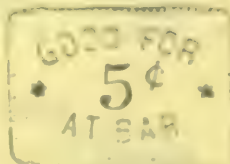

This token struck a bell with me when it was first reported, and I stumbled onto the attribution while going through Steve Albin's card catalogue of California trade tokens. This company is still in business; the tokens were used some years ago.

1973 - ISSUE 6

Please note my new address as given above. I still have my old post office box and will keep it for some time, but I want to phase it out gradually.

Several months ago a friend asked me to start working for him on a temporary basis to help out on a rush program. He asked one day and I started the next, so it left no time to wind down some of the projects and other token matters with which I am involved. As a consequence, some things had to be put aside as I found my time for tokens reduced by about 50 hours a week! Now the job is completed and I am back "on vacation" again, so I am trying to tackle the many things that had accumulated. Needless to say, my correspondence is a shambles, but I will do my best to get that into shape very soon.

One of my projects has involved the new catalogue of Illinois trade tokens by Ore H. Vacketta. I have done some editing and then prepared the camera-ready pages for the printers. The page preparation has just been completed, and the book will be in the hands of the printers by the time you receive this. The book should be ready in a few months unless the paper shortage interferes. As soon as a price can be set, the new catalogue will be advertised in the METCA Trade Token Topics.

A feature of the Illinois catalogue is an extensive index of all the maverick tokens. Chriss Christianson prepared the card file of the maverick tokens which meant a lot of time and careful attention. Since just about every collector has at least a few maverick tokens from Illinois, it seems like this index should be very useful to all METCA members. Thus, beginning with this issue we will be running the index in serial form. Ray has agreed to double the size of this maverick section, so the complete index will take three issues. If there is enough interest in this sort of thing, perhaps we can run the index of California maverick tokens as well in the future.

I have on hand a number of maverick token rubbings and descriptions, plus a few attributions from recent listings. By the time of the next issue I should have sorted through my mail and then I will provide the recent attributions.

If you have any comments on the index of Illinois mavericks, I will be interested in them.

BEST WISHES FOR THE HOLIDAY SEASON AND FOR THE
NEW YEAR AHEAD!

- IDENTIFICATION KEY -

This listing enables one to attribute Illinois trade tokens which do not carry in their inscription a full attribution to Illinois. To provide more usefulness, some tokens may be listed several times--under the business name, under a possible variation of the business name, and under the proprietor(s)' name(s).

Tokens from Chicago which have "Chicago" in the inscription but not "Illinois," are not included in this listing. However, other tokens from other places which carry the name of the place in the inscription, but not "Illinois" (or some variation of the name of the state) are listed.

Identifications which involve a number as the first element of the identifying phrase are listed at the end of the alphabetical listing.
